

Galaxies R Bs meet

 Galaxies
R meet at
Bs Cabo de Gata
Sept. 23-27, 2013

at Cabo
de Gata

35% women!!

Thanks to the organizing committee

Ricardo Amorín
IAA -> OAR

Christina Thöne
IAA (JdC) -> IAA (RyC) 😊

Antonio de Ugarte Postigo
IAA (JdC) -> IAA (RyC) 😊

Javier Gorosabel
IAA -> Bilbao

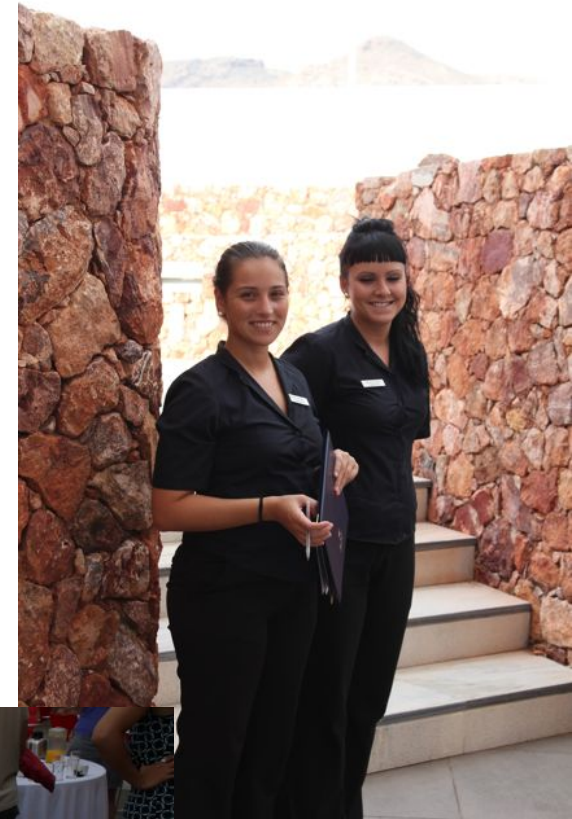

Carolina Kehrig
IAA

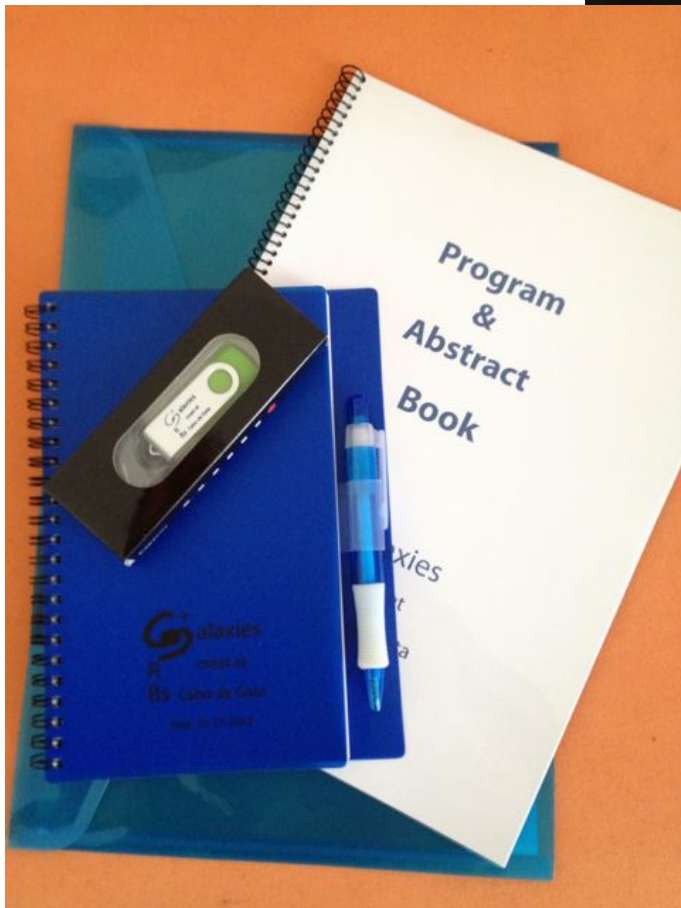

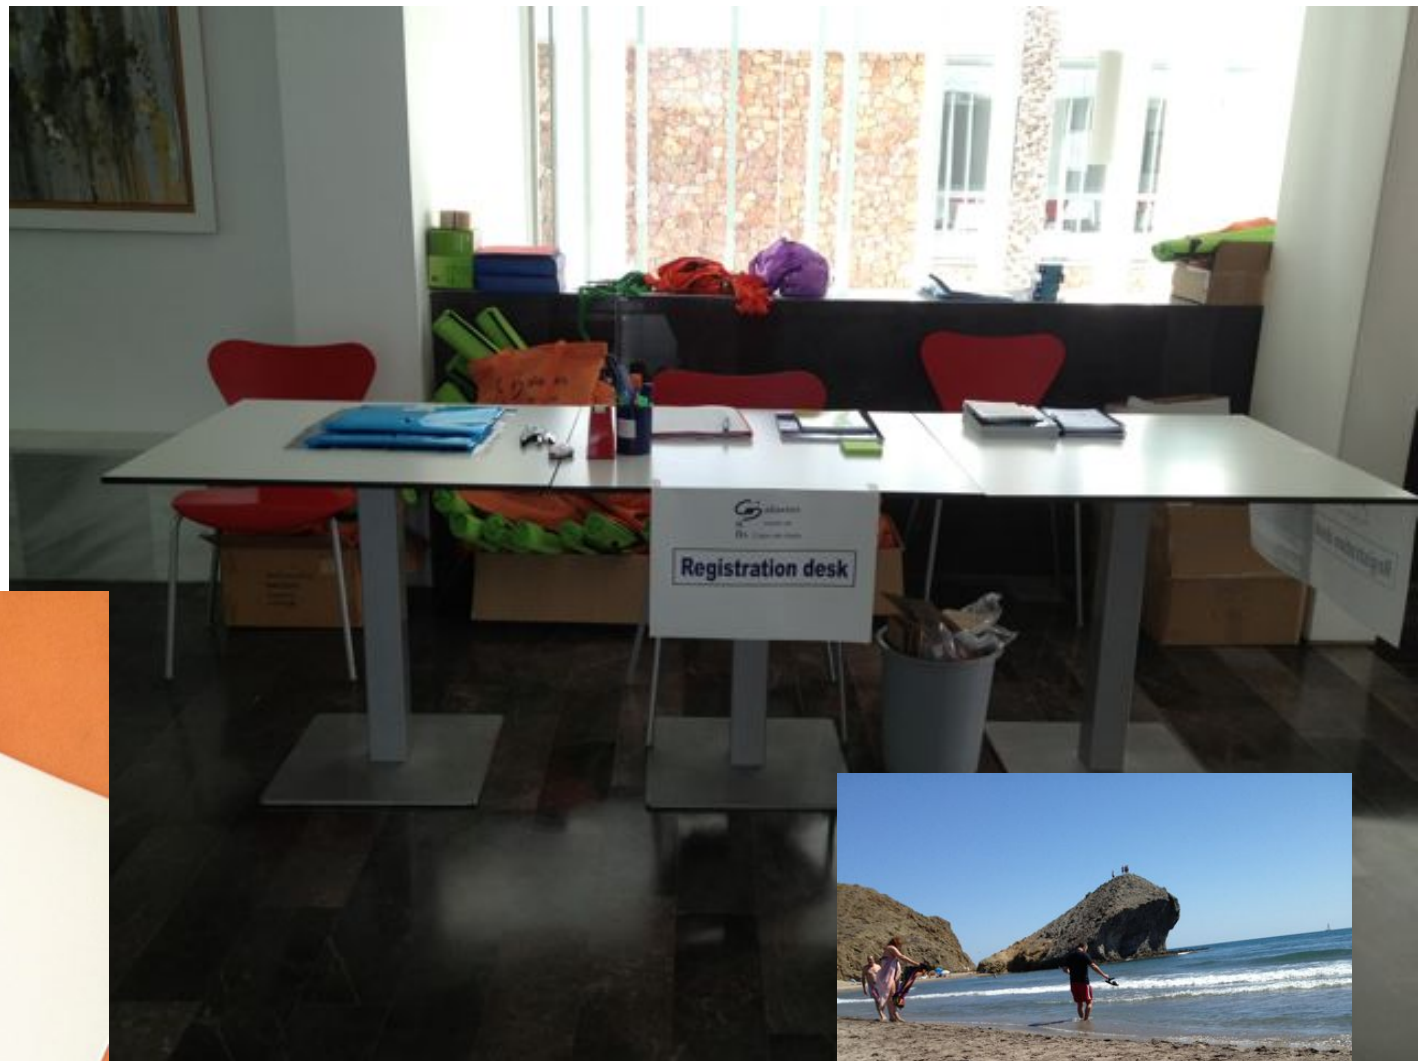

Pepe Vílchez
IAA -> Director!!

Sebas Sánchez
CAHA -> soon Mexico

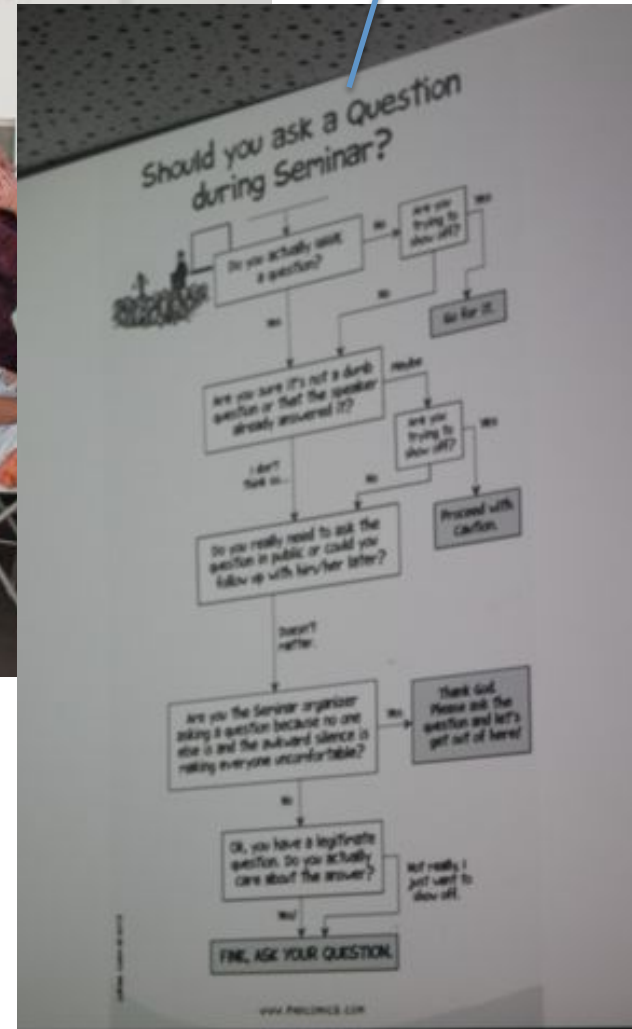

and the hotel!!

Intense discussions...

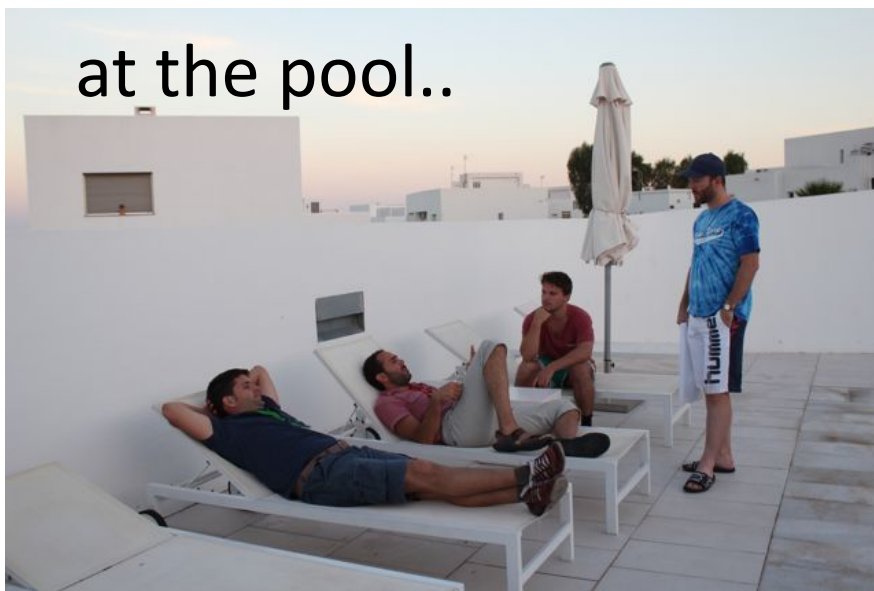

YES!!! PLEASE!!!

...also during lunchbreak

at the pool..

And speed-dating

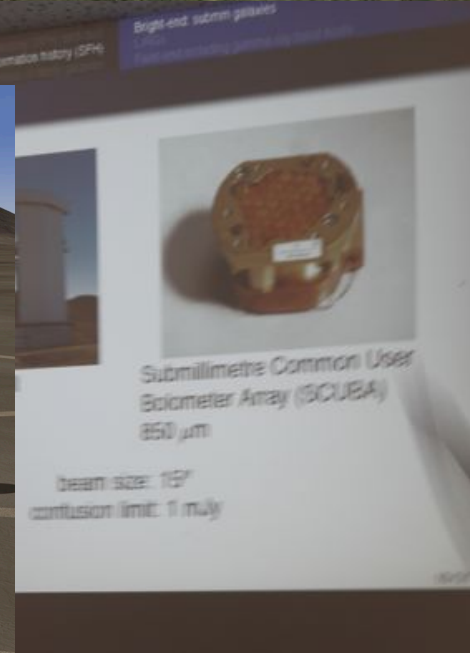

What have we learned?

GTC is the largest optical telescope in the world
(in case you didn't know yet)!!

But don't forget ALMA!

Stars are all round
(also the massive ones)

For some of them we still don't know
what they are

They are out there, we know it!

Observing them can
be quite nasty

But their hosts are
also really exciting

Some like certain progenitors
more than others...

Also the press and the public got very interested

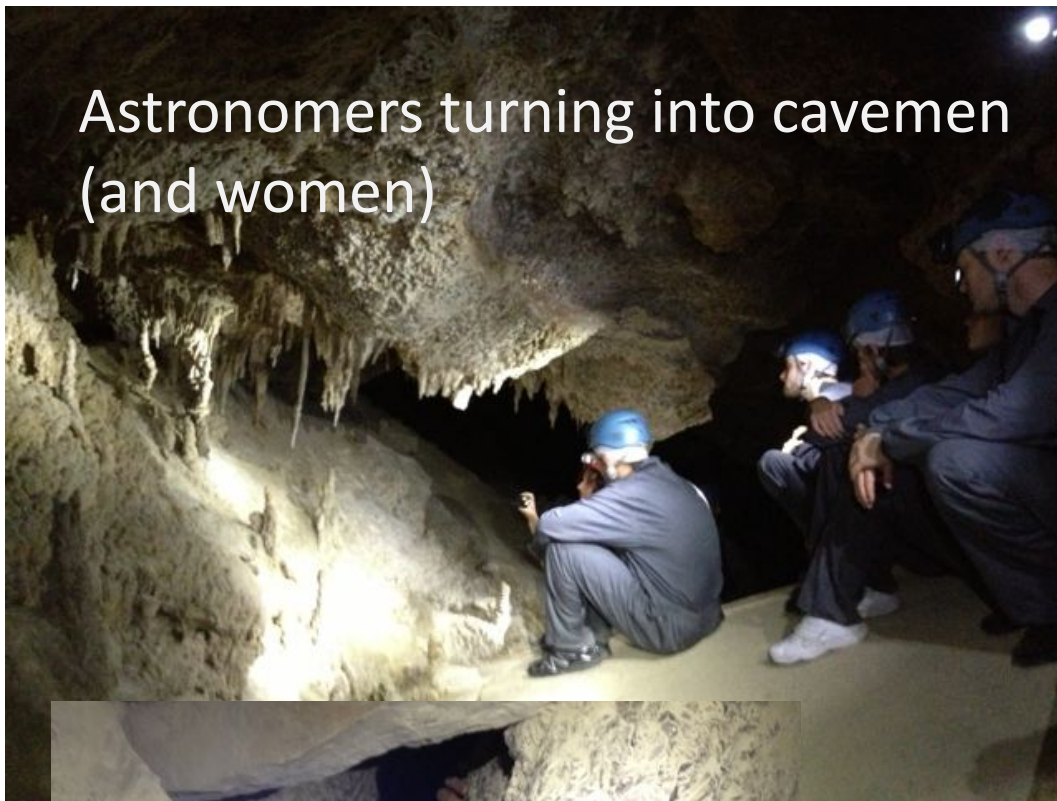

Presentación del evento en la Diputación.

19 SEPTIEMBRE 2013 • ESCRITO POR REDACCION

Astrofísicos de todo el planeta se darán cita la semana que viene en Las Negras

Astronomers turning into cavemen
(and women)

Others are training for the next olympics...

Don't forget the social aspect

The future?
